

MOCK ARCHIVE FILE

Rental workflow demonstration only

This synthetic PDF tests the completed-lease archive and download controls. It is not an executed contract, contains no real signatures, and is not the full generated lease.

Workflow record	Mock evidence
Application group	All required information received
Landlord decision	Agreed to proceed
Lease draft	Generated from saved lease values
Tenant signing	Synthetic receipt recorded first
Landlord signing	Synthetic receipt recorded after tenants
Archive	This clearly labelled PDF fixture

The application-specific names, unit, lease values, and signing references remain in the saved rental record. Download the lease draft from that case to inspect its populated Word template.
